

# TEST PLAN

## Purpose

I'm testing this product/platform to check the usability and determine how user friendly it is. I also want to check areas for improvement in case some things are unclear or hard to find.

## Testing Objectives

Test are made based on functionality, overall aesthetics, and usefulness.

## User Profile

- Gender: Male
- Ages: 28+
- Lives in: Washington State, US
- Profession: Software Engineers
- Family Status: Father with kids in primary school

## Testing Methodology

Test are made in person, at home.

## Task List

- Log in and search for primary schools at Kirkland WA
- Filter out schools with overall score above 8
- Narrow your search with adding range filter. Filter results within 15-mile range
- Like some of the schools you have found after your search
- find Kirkland elementary school and Mark Twain Elementary school and compare these schools

## Environment and Equipment

- Test are made in person and at my home
- Users are my friends, and they were invited to a dinner
- Users have given a laptop with a website present at browser
- I have taken notes while users experience with the web app on the browser

## Evaluation Measures

Users were asked following questions after the test session:

- How easy it was to perform the tasks you were asked?
- What features can be added to make the users experience easier?
- What are your suggestions about the website?
- Overall, how did you find the aesthetics of the website?
